BBVA
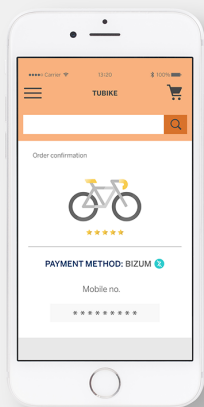

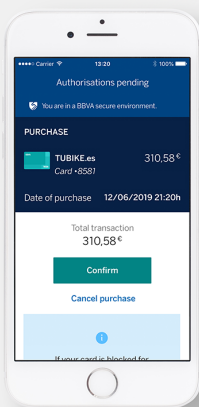

Now you can also shop online with
Bizum

Here's how to shop online with Bizum

1

When paying in your online store, **choose Bizum as the payment method and enter your mobile phone number.**
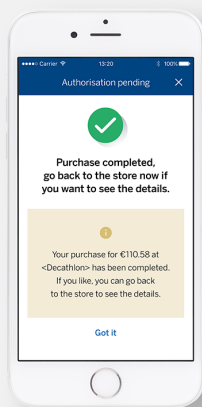

2

Validate the transaction at bbva.es or on the app by authorising it **with the code you get by text** (remember that if you turn your **notifications** on, you can access the authorisation more quickly and easily via a message).

3

Your **purchase is then complete** and **you can go back to the store to check** all its details.

More secure
The transaction **takes place in the BBVA environment** with your personal passwords.

Easier and simpler
Pay with only your phone number. **Just as you already use Bizum with your friends, do the same with your online shopping.**

Remember:

✓ **You can turn this payment method off** when you aren't using it **and turn it back on** when you need it in the Bizum settings on the BBVA app.

✓ If **you turn your notifications on in our app,** your experience will be a whole lot easier.
